Emotional Lighting Natural Humidifier Air Cleaner Incomo

LH-1602/LH-1603

Humidifier + Air Cleaner + Lighting [Product Manual]

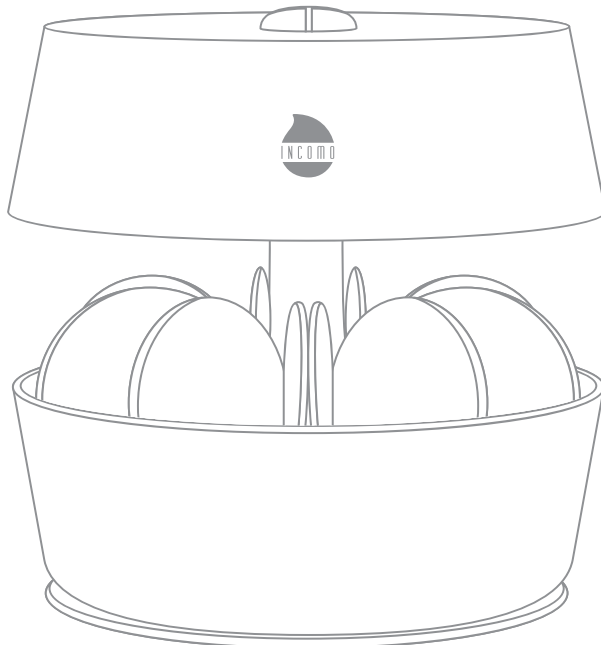

Principles of Humidification of Incomo

By which humidification filter equipped on water tank absorbs water in the tank and evaporates water into the air, it raises internal humidity with convection phenomena of air.

Once more, humidifying fan equipped Incomo promotes evaporation of water and improves humidifiability more.

● Three Points of Incomo

Safe Humidification without Bacteria, Delicate Emotional Lighting,
Effects of Air Cleaning

Advantageous Features of Incomo

1

It makes you not worry about bacteria.

You can safely use Incomo because water particles of Incomo are super-micro particles without emitting bacteria and toxic substances.

2

It has a function of air cleaning.

Micro fiber air filter that is equipped to the internal part of air influx hole cleans a huge amount of dust in the first stage, and water in the tank and wet humidifying filter, in the second stage, filter dust, so you can see the effect of air cleaning by internal air convection phenomena.

3

Effects of internal lighting and interior.

You can use the delicate lighting that is operated by a touch sensor as sleeping light, lighting for milking, lighting for mood, etc., and you can use it four seasons that you don't have to use it as a humidifier.

4

It is convenient for washing.

On account of the structure of tank that is easily detachable and of the internal part of round treatment, it is very convenient for washing.

5

It has no over-humidification.

It is free from propagation of dust mites and molds, and it keeps appropriate humidity.

Suggestions for Use

Use properly after you read suggestions in the prior to using it.

1. It is designed for AC100–240V, so the product can be used in anywhere internationally. However, you must not use it when a code or plug is damaged, and you must use the exclusive adapter of Incomo that was provided when you bought it.
 - Careless ways of using it may be a cause of fire and electric shock.

2. Don't put it in a place where it reaches hot air of an electric heater.
 - Fire and malfunction of a product, or damages of the filter and product might occur.

3. Effects of humidification will be decreased in a too wide space.
 - It keeps appropriate humidity at certain spaces such as bedroom or living room.

4. Don't put anything other than water into the tank.
 - Anything other than water might occur damages of the filter.

5. Use clean water in the lower than 30°C.
 - It reduces damages of filter so you can keep using it.

6. When you don't use it for a long time, store the tank and humidifying filter after you completely dry them.
 - After washing it by flowing water and completely drying it under the shadowy space, then store it. If the filter is wet or water is stagnant, then it might be a cause of smells or malfunctions.

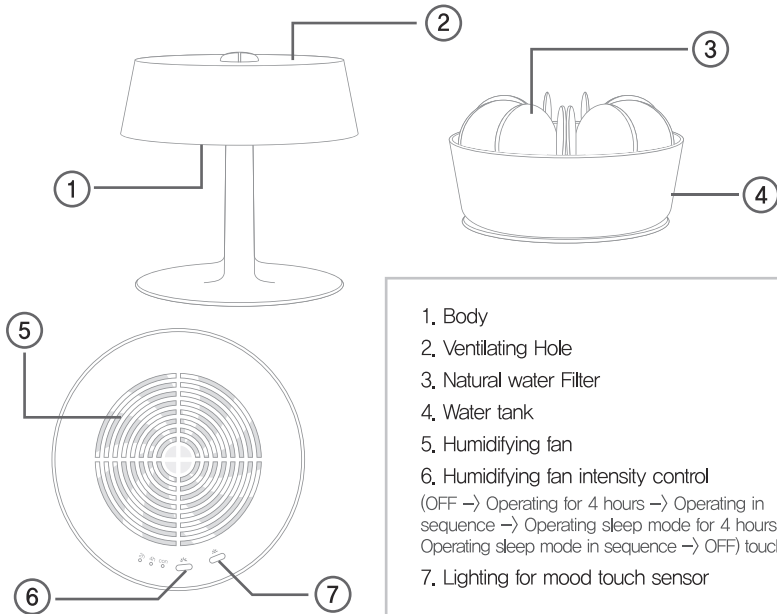

7. Supply water in it frequently.
 - If the tank lacks of water and filter is dried, then humidifying effects will not be activated.

8. Install it on a horizontal spot.
 - Its tank is not structured as isolated, so it can overflow, and be a cause of malfunctions.

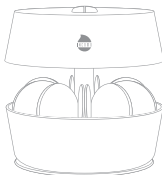

9. Be careful for children not to touch the filter or to put it into their mouths.
 - If the filter has been used for a long time, then it might harmfully impact on children's health.

Emotional Lighting Natural Humidifier Air Cleaner Incomo [LH-1602 / 1603] Humidifier+Air Cleaner+Lighting

The name of each part

Components

Body

Natural water Filter

DC power Adapter

How to Manage the Product

1

Body

Softly clean the body with a soft rag.
Don't use a stimulus chemical stuff because it might caused the surface of the body to be decay.

2

Humidifying
Filter

The phenomenon that the upper parts of the humidifying filter are faded in yellow or in white is a natural phenomenon that toxic substances in water or air don't float in the air. You can clean them by washing water that is flowing. However, the filter's availability might be shorten depending on ways of washing. You are recommend to change the filter every 3 months.

3

Water Tank

After detaching the humidifying filter, wash the internal parts using a sponge or soft stuff, and if you want to store it for a long time, then you should store it completely drying internal humidity of it.

4

Humidifying
fan and Air
Filter

Washing the humidifying fan: Detaching micro-fiber air filter by opening ventilating hole, remove dusts at the wings of the fan by soft brushes or cloths.
Washing the air filter: air filter can be re-used semi-permanently by dusting off.

How to Open and Close Ventilating Hole

Suggestions

Don't dissolve the product arbitrarily.
When the product is broken, ask the AS center and be treated. If you arbitrarily dissolve the product to cause it to be malfunction, then you can't be treated by free AS. (But you can open and close the upper ventilating hole for washing.)
